CLEUSEAU TEXT
QUICK REFERENCE

Filing

F2.....Load from file
F3.....Save to file
CTRL_V..Verify file with saved file

Mode setting

LABEL...Toggle label line on/off
CTRL_J..Toggle Cleuseau TEXT on/off
CTRL_O..Toggle INSERT/OVERWRITE

Moving

←.....Move left one char
SHIFT←..Move to start of word (prev)
CTRL_A
CTRL←...Move to start of line
CTRL_Q
→.....Move right one char
SHIFT→..Move to start of word (next)
CTRL_F
CTRL→...Move to end of line
CTRL_R
↑.....Move up one line
SHIFT↑..Move to top of screen
CTRL_T
CTRL↑...Move to top of file
CTRL_W
↓.....Move down one line
SHIFT↓..Move to bottom of screen
CTRL_B
CTRL↓...Move to end of file
CTRL_Z
CTRL_G..Go to the next line

Character editing

BKSP....Delete char left of cursor.
CTRL_H
DEL.....Delete char under cursor
ENTER...Insert CR and line feed
TAB.....Insert tab to column 1,9,17,..
CTRL_I
CTRL_P..Insert control char

Searching and replacing

F1.....Search forwards
F4.....Search backwards
CTRL_N..Search for next string
CTRL_S..Replace and search (**PAUSE**)
CTRL_Y..Repeat replace and search

Selecting and pasting

F7.....Set select marker at cursor
F5.....Copy selection to paste buffer
F6.....Cut selection to paste buffer
CTRL_E..Append to paste buffer
CTRL_L..Lowercase selection
CTRL_U..Uppercase selection
PASTE...Insert copy of paste buffer

Miscellaneous

BREAK...Cancel any command (**CTRL_C**)
ESC.....***n*** times, repeat command
F8.....MENU or BASIC (exit TEXT)
PRINT...Print screen on printer
SHIFT_PRINT..Print file on printer
CTRL_D..Display # of bytes/words/lines
CTRL_X..HELP (**CTRL_X** **CTRL_X** for all)

BASIC INSPECTOR
QUICK REFERENCE

Editing

.RENUM *<range>*[TO*<num>*][STEP*<num>*]...
Renumber range of lines.
.MOVE *<range>*[TO*<num>*][STEP*<num>*]...
Move the range of lines.
.COPY *<range>*[TO*<num>*][STEP*<num>*]...
Copy range of lines.
.MIN [*<num>*]...Minimize program size.
.DELCOM *<range>*..Delete comments in range.
.SQUASH *<range>*..Unnecessary blanks, end quotes and semi-colons removed.
.PACK *<range>*[LEN*<num>*]...Pack program.
.EXPAND *<range>*...Unpack program lines.
.KILL *<range>*..Delete lines in range. (Doesn't update line #s.)

Debugging

.STOP *<range>*[=*<string>*]...Insert stop points. Shown as |.
.PRINT *<range>*[=*<string>*]..Insert print points. Shown as _.
.CONT *<range>*[=*<string>*]...Insert continue points. Shown as ~.
.OFF *<range>*[=*<string>*]....Delete stop, print or continue points.
.LOG..... Print pt log to screen.
.LOG [*<num>*]..Print pt log file num.
.LLOG..... Print pt log to printer.

Miscellaneous

CTRL_U.....Delete input Line.
CTRL_X.....HELP. BASIC Inspector.
ESC.....Next line number.
.FILES..... Files & sizes (screen).
.LFILES..... Files & sizes (printer).
.LIST*<range>*[=*<string>*]..Lines in range with ***<string>*** (screen).
.LLIST*<range>*[=*<string>*].Lines in range with ***<string>*** (printer).
.STEP *<num>*...Set auto line num step.
. (dot)..... List next line to execute and the GOSUB/RETURN stack.

GETTING STARTED

To install Cleuseau's software after a cold restart:

M100	**CALL 63012**
T200	**CALL 61167,2**
NEC	**EXEC 62393**

"Cleuseau" will appear in the lower right corner of the menu.

To access ROM2:

M100	**CALL 911**
T200	**CALL 921,2**
NEC	**EXEC 1124**

The CMD> prompt will be shown. Use ? for help.

To disable Cleuseau, as if it were cold restarted or removed:

M100	**CALL 913,145**
T200	**CALL 921,146**
NEC	**EXEC 1124,145**

BASIC examples

To reduce a program to its minimum size

.MIN [*<num>*]
Sure? **Y**

where ***<num>*** is the maximum line length desired.

To list all lines that assign X a value

.LIST =X=

To list all lines that GOSUB 1000:

.LIST =GOSUB 1000

To trace program execution on printer:

.LLOG
.PRINT
RUN

TEXT examples

To move to the 100th line in the file:

CTRL_↑ **ESC** **99** **ENTER** **CTRL_G**

To count the number of bytes, words, or lines in the file:

CTRL_↓ **CTRL_D**

To count the number of times a word occurs in the file:

CTRL_↑ **ESC** R **ENTER** **F1** ***<word>*****ENTER**

To replace & search, checking each time

CTRL_S ***<string>*****ENTER** ***<string>*****ENTER**

first ***<string>*** = search string
second ***<string>*** = replace string

At each occurrence press:

CTRL_N to search (skip)
CTRL_Y to replace and search

Use **F1** and **F4** to control the search direction.
